 Plato, the prince of all philosophers (in wisedome, knowlage, vertue, and eloquence, farre exceeding all other gentyles) was borne in Athens, his father was named Arison (of an aunciente and honourable house) his mother Perictiona, descended from Solon. Lying in his cradell, bees were founden to bynge hong into his mouth, without hurtynge the chyld: whiche diuinours did interpret, to signifye, that from him shoulde flowe eloquence moste sweete and dilectable. Socrates dreamed, the night before he was brought to him to be instructed, that he helde betweene his knees a whyte cygnet, who hauynge feathers quickly growen, flew by toward heauen, and filled the ayre with most sweete tunes: So the day after, Plato bynge brought by his father, Socrates beholding him well, saied: This is the byrde, whose ymage I behelde the laste nyght. His name was fyrste Aristocles, and after called Plato, because (as some suppose) he was boode in the shoulders: other wryte, because he had a brode visage. In his youthe he exercised wyllyng and other seates of actiuitee: and

Byll he was 17. yeres olde, he was him self to make amorous verses, whiche after he came to heare Socrates, he came into the citye and bourned, and then most aruently and assiduously hearde Socrates doctrine, during the time that he liued. After that, he not onely hearde the most famous philosophers and Geometricians in Grece, but also went into Italy, into Sicilye and Egypte, to heare the mystical sciences, and it is thought, that he hearde some of the prophetes, sens there bee founden in his mooungs sentences not abhorring from our catholicke faith. He was experte in martiall exercises, for he had fought in thye greates battailles. He chose a place by Athens, called Academiia, where he taught: and therefore his disciples were called Academicke. There was in him a maruailous sharpnesse of witte, with an incomparable dexteritee in disputynge and makinge of answers: his constancie, temperance and grauitie, with courtysie in language, were of all other incomparable: he was so desirous of knowlage, that he was no lesse studious to learne, than he was to teach.

Wherefore beinge scorned of one, whiche asked of him, how longe he woulde be a scholar, so longe (saied he) as I repente not to bee wiser and better. He is called diuinus Plato, for his excellent doctrine, whiche conteyneth many thynges (as saynt Augustin saith) which accord with holy scripture: so that therein is persuaded the first parte of Genesis vnto Spiritus domini ferebatur super aquas, and the miste rie of thye persons in diuinitie is there explysed. The people there were first pure and simple, and as shepherdes, not hauing knowledge of money, nor of any number about one hundred, liuing by exchange, not knowynge weight, measure nor husbandry, and yet ready in warres. They honoured for goddess the sunne and the moone, hauinge amonge them (as *Strabo* writeth) xxvi. languages, and as many kynges. Albinus, the name of an Emperour. also the surname of diuers *Romains*.

Albion, and *Bergion*, two gigantes the sonnes of *Neptune*, slayne by *Hercules*.

Albion, (the moste auncient name of this Ile) conteyneth *Englande* and *Scotlande*: of the begynnyng of whiche name haue been sundry opinions: One late feigned by hym, whiche first printed the *Englyshe* chronicle, wherein is

neither similitude of trouth, realone, nor honestee: I meane the fable of the *Egypte* daughters of one *Dicoridian* kyng of *Syria*, where neuer any other hystorie maketh mention of a kyng of *Syria*, so named: also that name is *Greeke*, & no parte of the language of *Syria*. Moreouer the comyng of them from *Syria* in a myppe or bote without any marynours thorough the sea called *Mediterraneum*, into the ocean, and so finally to fynde this Ile, and to inhabyte it, and haue generation by duels, is both impossible, and muche reproued for this noble Realme, to ascribē his firste name and habitation, to suche inuentours. In other opinion is (whiche hath a more honeste simile) that it was named *Albion*, ab *albis* rubus, of white rockes, because that vnto them, that come by sea, from the east or southe, the bankes & rockes of this Ile doo appere white. Of this opinion haue I most meruaile, because it is written of great learned men. First *Albion* is no latine word, nor hath the analogie, that is to say, the proportion or similitude of latine. For who hath founde this syllable, on, at the ende of a latine word. And if it should haue ben so cald for the white colour of the rockes, men would haue called it *Alba*; or *Albus*; or *Albū*. In *Italy* were towncs called *Alba*, & in *Asia* a countrey called *Albania*, and neither of them toke their begynnyng of white rockes or walles, as ye maye see in booke of *Geography*: nor the water of the riuer called *Albis*, semeth any whiter than any other water. But if where auncients remembraunce of the begynnyng of thynges lacking, it may be leessfull for men to vse theyr coniectures, than make myne be as well accepted, as *Plinius* (although he incomparably extolled me in wysedome and doctrine) specially if it maye appere, that my coniecture shall appoche more nere to the similitude of trouth. Wherefore I wil also sette forth myne opinion, onely to the intent to exclude fables, lackyng epyther honestee or reasonable similitudes. When the *Greekes* began first to prospere, and theyr citess became populous, and wared puissant, they which traualled on the seas, and also the Isles in the seas, called *Hellespontus*, *Aegeum*, and *Creticum*, after that they knewe perfectly the course of sayling, & had founden thereby profyte, they by little, and littell attempted to serche and fynde out the commodities of outwarde countreys, and lyke as *Spanyarden* and *Portugales* haue late dooen, they experienced to seke out countreys before vnkownen. & at last passyng the streytes of *Martocke*, they entred into the great ocean sea, where they founde dyners and many Isles. Amonge whiche they perceyving this Ile to be not onely the greatest in circuite, but also most pleynouse of euery thyng necessary to man, the ayre most hollesome and temperate, the earth apt to byrnyng forth al thynges that maye susteine, the fildes of

brookes and muttons most sweete and delicate, the wull most fyne, not lackyng any kynde of mettall, hauing abundance of woodde & timber to buylde with, also great and sayze riuers, with great lakes or meeres of frethe water, & as well in theim, as in the sea, wherewith the countrey is enuyroned, was great plentie of fyshes, of diuers sortes most apt to be eaten: thei wondering and reioysyng at theyr good and fortunat arriuayle, named this yle in grecke Olbion, whiche in englishe signifyeth happy, in latine Felix, like as part of Arabia, which is most fertile, is called Arabia felix. But in processe of tyme, by reioyce of rundry people hauing dyuers languages, no metuayle though one letter were chaunged, and the fyrst letter, O, tourned into A. And so for Olbion, it was at the last cald Albion, which woozde hath no maner of signification. This chaungeyng of letters is not vnlkely, sene at this present tyme the northerne men of this realme do vse A, in wordes, where southerne men vse O, as a bone, a stane, a bare, a band: for a bonz, a stonz, a boze, a bonde. And amonge the Greckes were lyke alterations of letters. And it maye be moze easily bozne, that one vowel maye be chaunged in a worde, and specially A, into O, whiche in somme mans mouth, soundeth often tymes like, than that a syllable impertinent to the proportion of latine, shoulde be vnaptly added to. Not withstanding Pomponius Mela maketh mention of a gyaunt called Albion, whome Hercules slewe in Gallia, whiche was sonne of Neptuneus, who moughte with moze reason be demed the fyrste geuer of his name to this yle, than that the other surmyles shoulde be likely. If any man can fynde matter moze certayne, concerning the begynnyng of this Ile, I will not bee offended, but congratulate with him his good fortune and diligence.
